

DanaCoverseal 20-59

Our PP-based die-cut lid!

- Designed for recycling
- Suitable for production with metal detection
- Fast and reliable seal
- Good tear strength
- Smooth peel

The DanaCoverseal 20-59 is the perfect lidding solution for all PP based, heat sealable cups, tubs and bowls. This coextrusion film offers a **smooth peel** with a reliable seal at the same time, making sure no tearing happens or residues are left on the cup.

With excellent performance on existing packaging lines these lids are available on a reel or as individual die cut pieces. Thanks to the newest printing technologies we can offer stunning designs – making you packs stand out at the point of sale!

Converting

- Printable with up to 10 colours
