

HighGlossPaper

The recyclable premium packaging

- Premium high gloss optics
- Brilliant, intense colours
- Inks protected from scratching
- Cerec recycling certificate*
- Available for single- & multipacks

Our innovative HighGlossPaper combines the advantages of a reverse printed film - protected inks and brilliance of colors - with recyclability (Cerec certificate*). It can be used as a single or multi pack wrap and runs smoothly on existing packaging machines. According to your individual needs the high gloss effect can be applied to either the entire film or in specific areas to enhance the design or performance. With an additional heat-sealing varnish on the reverse side, the paper film can be easily sealed around multipacks.

* French certification
