

MonoTwister^{re}

The transparent, recyclable, PE twist film!

- Twistable PE film - Ready for recycling
- Can be used for single and double twist
- High transparency and gloss
- Outstanding runnability
- Excellent twistability

PE is the first choice material for packaging throughout Europe due to its widespread recyclability. This allows for savings in disposal costs but does not mean your efficiency will drop: Thanks to its excellent runnability, good deadfold and outstanding mechanical properties the MonoTwisterre allows highest machine speeds and a steady packaging flow/workflow. Available in transparent, metallised or white, the film can be printed excellently and thus enables an attractive design for the POS.

Not convinced? We offer a **high performance version** with supreme twist properties! Especially suitable for soft and delicate confectionery that needs to be handled with care, yet packaged securely, or simply for everyone who wants to push his twist packaging machine to its limits.

Converting
