

We – that's more than us.

### The **re**think initiative

Our objective is to make packaging as sustainable as we can. That's why we have launched the rethink initiative: Together with our clients we rethink their packaging in a holistic process, considering the needs of the product itself, local legislations and individual expectations. We have already achieved reductions of plastic of up to 80%.

What will we achieve together with you?

### Partners

The adapa Group is very well connected in our partner network. At this point we would like to highlight a few of our highly appreciated partners:

### packnet

Without a fitting machine the best packaging film won't get you very far. Knowing this, we keep a sustained network of machine supplier partners. If you need a non-binding advice on which machine to choose – just let us know and we'll set you up with the partners from our PackNet!

## Helping you make your best choices.

Our PackScience Center is set up in a way to support you in making the best choices you can. Our offer includes not only more knowledge for you but we also invest our time and provide our machine infrastructure, so that you don't have to use yours.

In close cooperation with our departments such as our product management, R&D, the sustainability team, our technical application service and sales we offer you the perfect surrounding to get the best for you.

### packacademy

Learn all about packaging from our experts from science to future

### techcenter

Test your new films without impacting your own production or have samples made for you

### packnet

Get in contact with machine suppliers from our network

## We are here for you!

The adapa PackScience Center is the place where our world rotates around you.

Our objective is that you get the best results out of our packaging, because that's how we can achieve our purpose.

With the services we offer in the PackScience Center we truly work on the core of things, trying out new packaging solutions, connecting the right partners and sharing our knowledge.

### What can we do for you?

We are the accelerator of change for a better world through protective packaging solutions

Our PSC consists of many members who are there for you such as:

- Product Management
- Technical Application Service
- R&D

Welcome!

# packscience center

adapa

## techcenter

A new packaging is a big step for you. We want to make this step as easy and pleasant as possible. On the state of the art packaging lines in our TechCenter you can test your new packaging – supported by our experts – make samples for retailers or consumer tests or have all this done by us, transferred to you via our stream.

In TechCenter Marina Staltmeier, Manager PackScience Center, works in close cooperation with our Product Management and Technical Application Service bringing together the knowhow on our films with the needs of our customers.

## packademy

It's simple: Better knowledge = better decisions. Therefore we love to share knowledge with our partners. The wide programme of seminars covers the important facts all around flexible

packaging and plastics in general. Your need is not covered? Just get in contact and we will set up your individual training session!

## Workshops and Seminars

### Barrier Functions in Plastics

It is incredible to see what a layer of plastic of minimal  $\mu$  thickness is capable of. Optimise your understanding of the potential and capability of your packaging.

**Target group:** purchasing, quality management, packaging development, production

### Production Technology

How do you turn small, hard granulates into large, multifunctional films? This and other mysteries are solved in this seminar about extrusion.

**Target group:** purchasing, production, packaging development

### Packaging Machines

New, sometimes very special packaging materials can be a challenge for machine operators. We support you in finding the perfect setting and we are also happy to visit you on site!

**Target group:** production, packaging development

### Product Training

Deepen your knowledge of our products and thus optimise your production processes!

**Target group:** purchasing, quality management, packaging development, production

### Sustainability / Future of Packaging

Hardly any other topic drives our society as much as sustainability. What does it mean in relation to packaging? Our colleagues are industry-renowned experts and more than willing to share their knowledge with you.

**Target group:** purchasing, management, marketing, packaging development

### Market Intelligence

Thanks to our many sites throughout Europe and our membership in several initiatives and associations we are always well informed. Use our knowledge to your advantage!

**Target group:** purchasing, packaging development, marketing

### Individual Training

We develop individual trainings tailor-made to your needs. This includes topics such as sustainability, quality management and regulatory matters.

**Come and talk to us – we are happy to put together a tailor-made concept!**

### Raw Materials and Film Properties

Dive into the fascinating world of plastics! The knowledge you gain in this seminar will make your everyday work with flexible packaging easier and will also help avoid difficulties at preliminary stages.

**Target group:** purchasing, quality management packaging development, production

### Printing Technology

In this seminar you will learn the basics of printing on flexible films and the specifics of the most common printing technologies (rotogravure, flexography, offset and digital printing).

**Target group:** purchasing, quality management, packaging development, marketing

**Which seminars are relevant for you? Register right away!**
