

Reclose films (PE & PP)

Sealing films for the manufacture of laminates
and lidding films with resealing function

- Film as PE or PP versions
- Different opening forces available
- High transparency
- Ideal for user-friendly packaging

Convenience in packaging is very important to consumers. With our reclose films, you can respond to this in the best possible way!

Our portfolio includes films with different opening forces, which enables us to offer you a tailored solution for your application. What all films have in common is their exceptionally good sealability. This guarantees reliable processability on traysealers and thermoformers and the high transparency allows a clear view of the pack contents.

Score extra on sustainability: the reliable resealability effectively prevents food waste, and with our L-version you can consistently implement Design for Recycling specifications. Of course, our films can also be laminated against other plastics.

Converting

- Available in transparent and white
- For mono- or multi-material laminates
- Laminates against PE, PP, PET or PA

Markets / Application

- For the production of lidding films with reclosure
- Can be used on rigid and semi-rigid trays
Ideally suited e.g. for cheese slices or cold cuts

Technical data

Version	Type	Area of usage	Opening force	Sealability	Optical properties	Thickness
L-version	Coex PE monomaterial	Worldwide	***	++	++	50 – 70 µm
M-version	Coex PE	Worldwide	**	++	++	50 µm
G-version	Coex PE	EU-tailored	*	++	++	50 µm
PP-version	Coex PP	Worldwide	*	++	++	50 µm
