

Our best for your goods.

Coffee is an extremely valuable product. Thousands of aromas, years of developing sophisticated know-how, plenty of months of development, lots of passion during the selection and roasting process – there is so much value in coffee that goes far beyond the pleasure it gives to millions of people around the globe.

Lets **re**think your packaging

We at adapa rethink existing packaging solutions in collaboration with our customers to develop more sustainable alternatives. As the first company in the market, our group was able to offer a recyclable solution in all its segments except pharma as early as 2019, for instance. To help guide our efforts, our sustainability strategy focuses on our 5R approach, covering the five pillars of Responsibility, Reduction, Renewal, Replacement and Recycling.

In addition, we have entered into several partnerships with international networks, start-ups and research organisations to establish a circular economy and to combat food waste, one of the most important drivers of the carbon footprint in the food supply. In true adapa spirit, we work tirelessly to turn our vision of a circular economy into reality.

This is why we at adapa contribute to the protection of coffee every day by developing our best possible packaging solutions.

-  responsibility
-  reduction
-  renewal
-  replacement
-  recycling

adapa is a member of the SAVE FOOD initiative.

Together with members from industry, politics and civil society, SAVE FOOD aims to drive innovation, promote interdisciplinary dialogue and spark debates. In order to generate solutions, "from field to fork", SAVE FOOD involves all actors across the entire value chain and on a broad front.

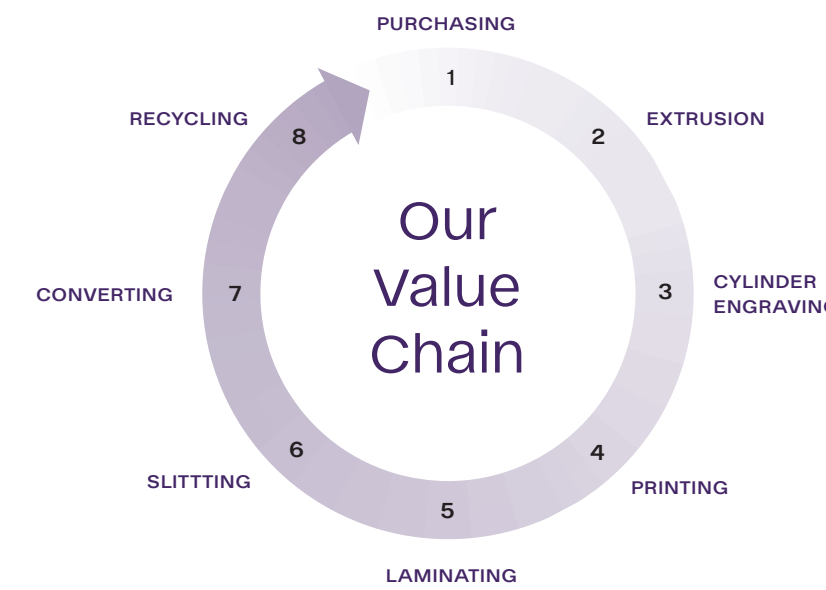

Member of:

About us

adapa Group is a leading European supplier of sustainable tailor-made packaging solutions for the food industry.

Our Centres of Excellence, each a technological leader in its respective market, encompass the full range of competences along the entire integrated value chain, making adapa a solution provider for innovative flexible packaging.

With sustainability as our core purpose,

we fully endorse the European Green Deal and emphasise "HOW" we produce in every step of our business.

We creatively shape change in our industry

to prevent food loss and waste along the supply chain of essential goods by leveraging the power of state-of-the-art solutions.

In our quest for continuous improvement,

we work relentlessly towards establishing a circular economy, giving each day "Our best for your goods".

adapa

From Coffee Lover to Coffee Lover

You love coffee. So do we. At adapa we have set ourselves the objective to protect this valuable good, to give our best for your goods.

At chosen sites of our group all across Europe we have accumulated the most sophisticated know-how on how to best pack coffee in all its forms and flavors. With a total of over 300 years of coffee packaging experience our group is able to provide you with the perfect fit for your coffee. The profound know-know and the varying specialisations of our Centres of Excellence such as high performance lamination allow us to tailormake any structure your product might require.

Like for anything we do, sustainability is key for us also in coffee packaging. Therefore our R&D team has spent months on developing our recyclable full PE films. They run perfectly on packaging lines, look and feel great and can help you fulfill your sustainability goals.

Make it unique!

Your coffee has a typical, unique scent. We see it as our mission to make this also visible at the point of sale and at home with consumers.

How do we do that? With highest print qualities, perfect colour matching and impressive tactile lacquers. Also our many convenient extras such as zippers or spouts support you on your quest for higher brand loyalty by making your packaging irreplaceable in your consumers' homes.

Within the adapa Group we provide the complete range of state-of-the-art printing technologies for flexible packaging, as well as long-standing expertise in all steps of the printing process.

By the way: we're equipped to support customers on their individual growth path! We supply starting in smallest order sizes and with our digitally printed standup pouches you can start production without investing in a costly machine.
